

Are you a nurse working in Inflammatory Bowel Disease?

Would you be willing to complete an anonymous online survey regarding provision of sexual health care to men with IBD?

- The survey is anonymous and aims to find out more about nurses' knowledge, skills, and confidence to provide sexual health well-being advice and health care to men with IBD.
- The findings will support the development of an intervention to help nurses provide sexual health care that better meets the needs of men with IBD.
- The survey should take approximately 15 minutes to complete and at the end you can opt into a prize draw for a £50 Highstreet voucher.
